ALAA MAHMOUD

Senior Full Stack .NET Developer

Cairo, Egypt | **alaa.mahmoud.dotnet@gmail.com** | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack .NET Developer with 7+ years of experience architecting and delivering scalable enterprise applications. Proven expertise in ASP.NET Core, Angular, and SQL Server with deep knowledge of Clean Architecture, CQRS, and modern development patterns. Successfully delivered 20+ production modules serving thousands of users, with demonstrated ability to improve system performance, reduce technical debt, and mentor development teams. Passionate about writing maintainable, testable code and implementing best practices across the full development lifecycle.

CORE COMPETENCIES

- Backend Development: ASP.NET Core (.NET 6/7/8), C#, Web API, REST
- Frontend Development: Angular (12–17), TypeScript, RxJS
- Data Layer: Entity Framework Core, SQL Server, PostgreSQL
- Architecture Patterns: Clean Architecture, Vertical Slice, CQRS
- Design Principles: SOLID, DI, MediatR, FluentValidation
- Security: JWT Authentication, .NET Identity, Role-Based Access
- DevOps & Tools: Git, GitHub/GitLab, Docker, CI/CD pipelines
- Methodologies: Agile/Scrum, Feature-Driven Development

PROFESSIONAL EXPERIENCE

Senior Full Stack .NET Developer | Nibras Almanar

December 2025 – Present | Cairo, Egypt

- Architect and develop enterprise-grade web applications using ASP.NET Core and Angular, serving business-critical operations for diverse client base
- Implement Clean Architecture with Vertical Slice organization, reducing cross-feature dependencies by 40% and improving code maintainability
- Design and build scalable REST APIs with clear separation of concerns, implementing CQRS pattern with MediatR for improved system performance
- Collaborate with cross-functional teams including product managers, designers, and QA to deliver high-quality solutions aligned with business objectives
- Lead code reviews and technical mentoring sessions, establishing coding standards and best practices across development team

Senior Full Stack .NET Developer | Ultimate Solutions Egypt

August 2023 – November 2025 | Cairo, Egypt

- Delivered 20+ financial and invoicing modules using Angular 17 and .NET 8, supporting complex business workflows for enterprise ERP system
- Engineered reusable UI component library with Angular Material, reducing development time by 30% and ensuring consistent user experience
- Implemented robust authentication and authorization system using .NET Identity and Angular Guards, securing sensitive financial data for 1,000+ users

- Designed comprehensive auditing middleware to track all system changes, improving compliance and security monitoring capabilities
- Built validation pipelines with FluentValidation, reducing data errors by 60% and improving overall data quality
- Optimized purchase return workflows using SQL Server stored procedures, improving transaction processing speed by 45%

Full Stack .NET Developer | Impress Digital Solution

February 2020 – March 2021 | Cairo, Egypt

- Successfully migrated 5+ legacy ASP.NET Web Forms applications to modern ASP.NET Core architecture, improving performance and maintainability
- Developed dynamic reporting system using ReportViewer for generating customized financial reports and invoices based on user-defined parameters
- Created responsive, mobile-friendly user interfaces using HTML5, CSS3, JavaScript, and jQuery, improving user engagement by 25%
- Built RESTful backend APIs using .NET Core with comprehensive error handling and logging mechanisms

Windows Forms Developer (Intern) | 4Soft

September 2019 – April 2020 | Cairo, Egypt

- Developed desktop applications using C# and Windows Forms for internal business process automation
- Implemented full CRUD operations with SQL Server, including data validation and transaction management
- Participated in debugging sessions and contributed to feature enhancements, gaining foundational software development experience

KEY PROJECTS

Enterprise ERP Invoicing System

- Built comprehensive financial management system using Angular 17, ASP.NET Core, and SQL Server
- Implemented complex invoicing workflows, inventory management, and financial reporting capabilities for multi-branch operations

Sakeny Real Estate Platform

- Developed full-featured real estate marketplace using Angular, .NET Web API, and PostgreSQL
- Integrated Google Maps API for property location visualization and advanced search functionality with custom filters

Hotel Booking System

- Created modern booking platform using Angular Material and ASP.NET Core with real-time availability checking
- Implemented payment gateway integration, reservation management, and customer notification system

EDUCATION

Bachelor of Science in Computer Science

Higher Institute of Computer Science | 2012 – 2017 | Cairo, Egypt

PROFESSIONAL CERTIFICATIONS

- Full Stack .NET Developer – Sharp Academy

- Angular Certification – Sharp Academy
- AWS Course Completion – Introduction to Machine Learning: Art of the Possible
- Scrum Fundamentals Certified (SFC)
